#### Rongo y CAS Jasig

Rongo integra la autenticación del CAS de la ESPOL, cuya URL es: <a href="https://auth.espol.edu.ec/login">https://auth.espol.edu.ec/login</a>, por lo que no se hace uso de un componente CAS externo.

Es necesario modificar el archivo "web.xml", localizado en "Rongo/Rongo-web/src/main/webapp/WEB-INF/" y agregar lo siguiente:

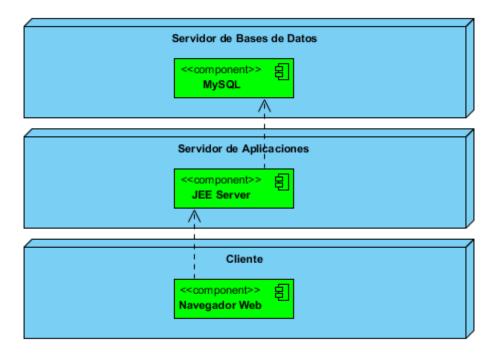

```
<welcome-file-list>
   <welcome-file>faces/pages/estudiante/index.xhtml</welcome-file>
</welcome-file-list>

Dado que rongo implementa Primefaces, es necesario agregar el siguiente repositorio en el archivo "pom.xml"
